## CAN YOU IDENTIFY THE ANIMALS?

Cut out the pictures of the animals below plus the species and facts on the next sheet. Then grab a big piece of paper and see if you can connect them all together correctly!

**AMUR TIGER**

**ALPACA**

**HUMBOLDT  
PENGUIN**

**ALDABRA GIANT  
TORTOISE**

**ROTHSCHILD'S  
GIRAFFE**

**NORTH AMERICAN  
BLACK BEAR**

They are the largest species of big cat in the world!

They are the tallest land mammal,  
growing up to 20ft high!

They are named after the strip of water they swim in,  
the Humboldt Current.

It is believed that they are the longest  
living of all animals.

They were domesticated 6,000 years ago by the Incas.

Despite their name, they can be blue-gray/blue-black,  
brown, cinnamon, or even (very rarely) white.
